

# **Dixie Crow Chapter Hosts MAGES Briefing**

Josh Fordyce, of the Mercer Engineering Research Center, led a professional briefing of Multi-Asset Gamespace Engagement Simulator (MAGES) at a Warner Robins, Georgia restaurant on July 27.

During the unclassified briefing, Fordyce fielded questions and wrapped up the presentation with Digital Integrated Air Defense System (DIADS) integration success stories. The audience was inquisitive and had many thoughts on what MAGES could potentially support, along with what other models/agencies can integrate with it in the near future.
