

D-TA Systems to Deliver Advanced EW Range Equipment Under New Contract

D-TA Systems, a leading provider of cutting-edge electronic warfare solutions, is thrilled to announce that it has been awarded a significant contract for the development and delivery of a state-of-the-art electronic warfare range equipment.

Theatre Replication for Advanced Training (THREAT).

Under the terms of the contract, D-TA Systems will design, manufacture, and deliver a proof of concept for a new generation of electronic warfare range equipment that will empower training of Belgian Defence pilots. The contract reflects the recognition of D-TA Systems' expertise in delivering innovative solutions to meet the evolving challenges in electronic warfare.

"We are honored to have been chosen for this critical project, and we are excited about the opportunity to contribute to the advancement of pilot training envisaged by Lt. Col Fabian Ferretti of the Belgian Defence" said Dr. Dipak Roy, executive chairman at D-TA Systems. "This contract is a testament to the trust that our clients place in our ability to deliver cutting-edge technology that addresses the complex needs of modern military aircraft."

Key Features of the THREAT Emulator:

- **Advanced Technology:** The newly developed equipment will leverage I/Q data streaming providing high fidelity signals with virtually unlimited emitter density on each node. Multiple nodes will be deployed in a test range with a common command & control.

- **Versatility:** Designed to be setup by two people in under 60 minutes from arrival at site to transmission of emitter signals.
- **Precision Testing:** The THREAT system will provide tracking and pointing of emulators at aircraft for precise and comprehensive evaluation of electronic warfare systems, tactics, and procedures on a flying range.

This groundbreaking electronic warfare testing equipment will provide clients with:

- **Enhanced Operational Capabilities:** The new equipment will empower defense and security forces to stay ahead of evolving electronic threats.
- **Cost-Effective Solutions:** D-TA Systems is committed to delivering cost-effective solutions that maximize the value of the investment for our clients.
- **Future-Ready Technology:** The THREAT system is designed to be scalable and adaptable, ensuring its relevance in the face of emerging threats.

D-TA Systems is a recognized leader in the development and deployment of cutting-edge electronic warfare solutions. With a proven track record of innovation and excellence D-TA Systems is dedicated to providing the highest quality products and services to meet the evolving needs of defense and security forces worldwide.
