

# Empower Celebrates 25th Anniversary

Entering 2025, Empower RF Systems is pleased to announce the company's 25<sup>th</sup> anniversary and results from the previous year that included capacity expansion and record business results.

The company opened a design center in Syracuse, New York earlier in the year and recently added 20% more space to its Inglewood, California design and manufacturing footprint with a second building conveniently located near Headquarters.

The company's unique blend of power amplifier standard products with common architecture hardware and embedded computing are providing a performance edge for key customers and their mission critical applications.

Jon Jacocks, President and CEO, stated, "Our record levels of orders, revenue, and backlog are a testament to the importance of the work we are doing and a validation of the course we have charted as a US based, locally staffed company with the expertise to blend RF hardware design with software / firmware capabilities that are essential for technology leadership in today's advanced and complex high power RF environment."

**Empower RF Systems is the technology leader in high power amplifier solutions for reliable communications, defense, and industrial applications. Our products incorporate the latest semiconductor and power combining technologies and originate from an extensive library of "building block" designs. Solutions range from basic modules to multifunction PA**

assemblies with embedded real time microprocessor control.</em>
